RE: Nutrient Offset Plan Report

Dear Mr. Hansen:

This letter serves as the thirteenth installment of the Pinnacle Foods Corporation's Nutrient Offset Plan Report. As required by Special Condition #7 of Pinnacle's NPDES Permit DE 0000736, "The permittee shall submit progress reports every six months outlining actions taken toward implementing this plan".

During the month of March, lime was applied and the annual fertilizer application was completed. As agreed, 30-lbs/acre nitrogen (ammonium sulfate), 30 -lbs/acre phosphorus and 120-lbs/acre potash (muriate of potash) were applied. On March 31st the field was spot seeded with orchard grass in the locations where the grass cover was sparse.

The spray irrigation unit was started up on May 8th for the season. The new grass that was planted is coming up and it is now time to cut the entire field. The tentative schedule is to cut and bale the field over this coming weekend.

Should you have any questions please call me at 302-934-3833.

Sincerely,

A handwritten signature in black ink that reads "Beth B. Sise". The signature is written in a cursive style with a large, stylized "B" and "S".

Beth B. Sise
